

V. Saardhak Ram

B.Tech Computer Science & Engineering Student · Aspiring Backend Developer

Bengaluru, India saarthak2988stu@gmail.com [linkedin.com/in/saardhakram-vemaraju](https://www.linkedin.com/in/saardhakram-vemaraju) github.com/saardhakram
saardhakram.github.io/portfolio_blog

SUMMARY

Second-year CSE student who enjoys turning ideas into working code. Built a browser game for a hackathon and a command-line text editor in C as part of a team, and practises data structures and algorithms regularly in C and C++. Looking for a software or backend engineering internship.

EDUCATION

REVA University, Bengaluru

2025 – 2029 (expected)

Bachelor of Technology, Computer Science and Engineering · currently in Semester 3

PROJECTS

Count Me Out · Hackathon browser game

Oct 2026

HTML, CSS, JavaScript · Team project · saardhakram.github.io/Count_On_Me-game

- Built an arcade game where every point the player scores spawns an enemy number that chases them.
- Implemented a dash move, combo multiplier, live danger meter and four random events (Speed Surge, Reverse, Lights Out, Number Rain).
- Added a leaderboard with daily and all-time best scores stored in the browser; deployed on GitHub Pages.

Line Editor in C · Command-line text editor

Sep 2026

C · Team of three · github.com/saardhakram/Portfolio-building-activity

- Designed the data structure and edge cases on paper, then implemented ~200 lines of C.
- Supports insert, delete, print, save/load, find, replace, word statistics and undo.
- Stored lines as an array of pointers to heap-allocated strings, with input validation so invalid commands never crash the program.

Personal Portfolio Website

Oct 2026

HTML, CSS · saardhakram.github.io/portfolio_blog

- Built a responsive one-page site presenting my projects, skills, learning journey and goals; hosted on GitHub Pages.

PROBLEM SOLVING

- **LeetCode:** 21 problems solved in C and C++ (17 easy, 4 medium), organised by topic with notes on approach and complexity · github.com/saardhakram/leetcode-solutions
- **HackerRank:** Problem Solving badge; solutions to 5 problems documented on GitHub.

SKILLS

Languages C, C++, Python, Java, JavaScript, HTML, CSS

Data MySQL, Pandas, NumPy

Tools Git, GitHub, VS Code, GitLens, Live Share, Arduino IDE

Concepts Data structures and algorithms, dynamic memory management, version control, pair programming

ACTIVITIES & INTERESTS

- Completed a 13-activity Portfolio Building course: Git workflows, collaborative coding, professional networking and a tech ambassador plan (Microsoft Learn Student Ambassadors, GitHub Campus Experts).
- Fast bowler at regular evening cricket practice; flutist.
